LOCAL STOCKHOLDERS IN LUCK

STRIKE 2000 BARREL OIL WELL AT MIDLAND

The stockholders of the Sias Oil Co., of Midland are feeling pretty happy this morning over the success of their first well near Midland. A 2000 barrel per day gusher was reported Wednesday morning. Thos. Cassidy and T. E. Douglas were at the wells Tuesday when they expected one of the wells to strike oil but it didn't come in until six o'clock Wednesday morning.

William Cassidy, of Midland, brother of Thos. Cassidy of this city reported Wednesday morning that they had struck a 2000 barrel well—the largest and best well in the Midland district.

Another well is pretty close to striking depth and is expected to produce at any hour. The Sias Oil Co., is drilling a number of other wells on their property and it looks favorable to becoming the leading oil industry in the state. Among the local stockholders are Thos. Cassidy, T. E. Douglas, Dr. Keyport, E. G. Shaw and T. W. Hanson.

MEMORIAL DAY

Once a year we are privileged to set aside a day in memory of those who offered their lives to their country. They marched forward when need arose. Theirs was the common cause of humanity, and their heritage to us has been peace, security and happiness.

We cannot honor too highly those who died on the field of battle, surrendering life that loved ones might live. In the presence of their sacrifice we can only bow in pride and sorrow.

The thinned ranks of the Grand Army of the Republic are moving toward their goal. Back of them stand the shadows of those heroic figures who established American independence. Before them are the veterans of the Spanish American and World Wars ready to step into the vacant ranks.

This day should also be dedicated to the memory of all of our loved ones who have gone before.

By virtue of the authority vested in me as Governor, I hereby proclaim Thursday, May 30, 1929, Memorial Day and urge statewide observance.

Given under my hand and the Great Seal of the State this twenty-third day of May, (SEAL) in the year of our Lord one thousand nine hundred and twenty-nine and of the Commonwealth the ninety-third.

FRED W. GREEN, Governor.

By the Governor:
JOHN S. HAGGERTY,
Secretary of State.

BASE BALL

Grayling H. S.
VS.
Gaylord H. S.

Saturday, June 1st

Game at 2:30
Admission, 25c

School Notes

(Written by the students of the English classes.)

Grayling Wins Another

Grayling High School baseball team won its fifth straight victory of the season when the boys defeated West Branch High School by the score of 18-6. From the time that Grayling came to bat in the first inning there was hardly any doubt about who would win the game. West Branch did not score on the locals at all and got only one hit until the fifth inning.

The starting pitchers were Skeich for West Branch and Schmidt for Grayling. West Branch had only three men in each of the first four innings, then Schmidt weakened; and with one man out, one on and one run in, Skeich went to the mound for Grayling. West Branch had a hard time scoring off either of our pitchers but Grayling seemed to score at will off West Branch. Post did the best hitting, getting four hits out of four times at bat. Pond got two triples and a single in five times at bat. The pitching summary ran something like this: Hits off Skeich 8 in 3 innings; off Myas, 4 in 1 inning; off Roseboud, 3 in 2 innings; off Schmidt, 2 in 4 and a quarter innings; off Skeich, 3 in 2 and two-third innings. Struck out, by Skeich, 5; by Myas 1; by Roseboud 1; by Schmidt 6; by Skeich 5. Base on balls: off Skeich, 3; off Roseboud, 5; off Schmidt, 1; off Skeich, 1.

Saturday the high school plays Gaylord high school here. The other game played between Gaylord and Grayling, Grayling won 4 to 2, and this second meeting of the teams is expected to be a real battle.

These lovely spring days surely aren't the kind a person likes to spend in school. It won't be long now, though, before we'll have the whole summer before us. No teachers will be saying, "Be sure you make this up," "Get out paper and pencil," and other numerous phrases that are not sweet music for the ear to hear.

Miss Lewis' Chemistry classes are busy making up experiments. It is very easy to get behind but not quite so easy to make up. All the experiments are to be in by Friday night, so for some of us it means late hustling.

The names of those who will have the various parts in the Commencement program have been posted by Mr. Cushman.

The Juniors gave the assembly for Memorial Day, Wednesday, May 28th.

Francis Brady is back in school after several days absence on account of a sprained ankle. Everyone is glad to see him back again.

Miss Richards Caesar class enjoyed a trip to the gym last Friday for the purpose of singing Latin songs. "Star Spangled Banner," "America," and "Maryland My Maryland" were some that were sung in Latin. Miss Elsie Johnson was the pianist for the occasion.

Everyone is beginning to think about final exams. We should all try to get everything caught up so that there won't be the usual rush at the last minute. This is very hard for both teachers and pupils and should be avoided if possible.

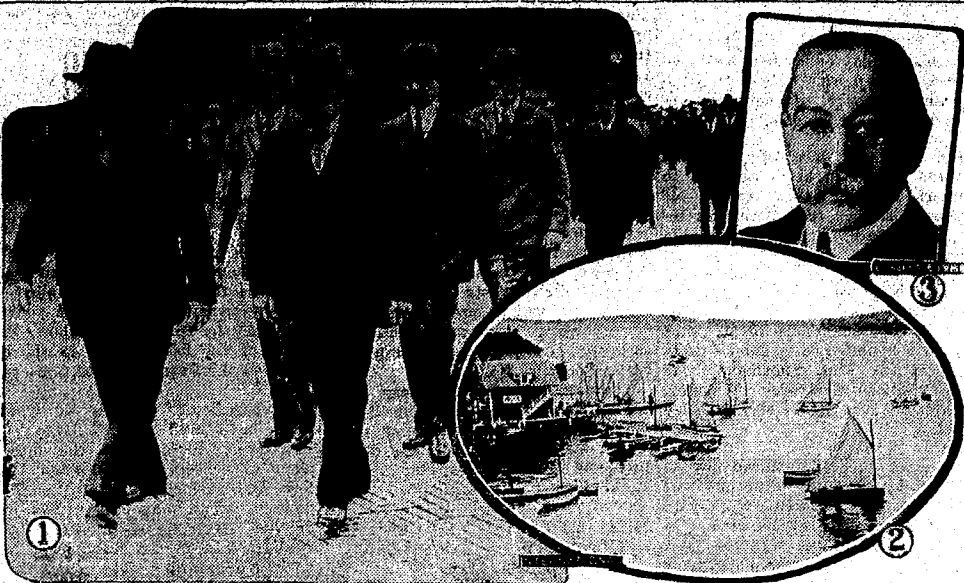

Everyone learned something new in Chemistry class Monday morning, at which time it was stated that cast iron on being poured from the crucible is put into pigs. Rather hot stuff for pigs!

Mary Schumann and Libby Matson spent Thursday in East Jordan and Boyce City.

Mary Mahneke, Kathryn Mallinger and sister Marie were out Friday.

Miss Hosier spent the week end at her home in Kalkaska.

(Continued on last page)

1—Class of 1879 at Annapolis naval academy marching to the mess hall as they did fifty years ago. 2—View of North Haven harbor, entrance to Little Maine town where Lindbergh and Miss Morrow may be married. 3—George W. Wickersham, chairman of President Hoover's law enforcement commission.

NANCY ADALINE DECKROW 1863-1929

At her home in Grayling, there passed away on Friday, May 24, Mrs. Nancy Adaline Deckrow, aged 66 years.

Mrs. Deckrow was born July 9, 1863, in northern Maryland. Her early life was lived there and at Chicago, where she received her education. At the age of sixteen, she came with her parents, Mr. and Mrs. D. P. Oaks, to Crawford County, locating on the old homestead near Higgins Lake in Center Plains Township.

In the year 1880, she was married to David London. To them were born three children, Mrs. Arthur Parker of Grayling, and two children who died in infancy. Mr. London, who was the first Sheriff of the County, having served in that office from 1878 to 1882, predeceased her in 1889, and in the year 1892, she was married to Frank R. Deckrow. To this second union were born six children: Oscar, John, Mrs. Doris Palmer, Mrs. Eureka Stephan and Hurl, and Vernon who died in 1924.

Mrs. Deckrow was a charter member of the Eastern Star, in which order she served as Conductress for seven years. She was also a member of the Lady Macabees, of which order she was Commander for several years. In Bay City, she was identified with the Bethlehem Shrine. In all of these associations she showed unusual readiness for service, and was public spirited.

The funeral was held from her late home on Sunday afternoon, with Rev. J. W. Greenwood, Pastor of the Michigan Memorial church officiating. After a short service at the home a large assembly of relatives and friends gathered at the church to do honor to her memory. The floral gifts were numerous and beautiful, showing the affectionate regard in which she was held.

There lives to mourn her death, her husband, the children afore-named, and twenty-three grandchildren, besides many relatives more remote.

Those present from a distance at the services were: Mr. and Mrs. Floyd Penoyer, Flushing, Mich., Oscar Deckrow and four children, Mr. and Mrs. Hugh Oaks and sons Harry and Ralph, Mr. and Mrs. Herbert Oaks, Mr. and Mrs. John West and Mr. and Mrs. Arthur Oaks, Flint, Mich., and Hurl Deckrow, Pontiac, Mich. It was remarkable that all of the living children and the twenty-three grandchildren were able to be present. From Pontiac there came Miss Velma Barger, but her one sister, Mrs. Ella Maquette was unable to be present. Interment took place in the cemetery at Grayling.

TEACIOANS NEVER LOST A NIGHT

Don Cox and his Teacioans of Flint have arrived and are ready to start their season at the Music Box at Lake Margrethe Decoration Day night. The orchestra consists of five musicians as follows: Don Cox, Flint, director, trumpet; Leo Schram, Grayling, manager, piano; Fay Loynes, Flint, drummer; Randolph, Flint, banjo; John Brewster, Owosso, saxophone.

Messrs. Cox, Schram and Brewster played last summer's season with the Whitney-Schram orchestra at Collen's Dance pavilion (now the Music Box), and on the night of Sept. 14 played at the Gaylord Fair. The very next night they opened in Flint at Teasco Inn as Cox's Teacioans, where they played each and every night ever since up to and including last Sunday, May 26th. That is a remarkable record for not a single player was absent for a single night from Sept. 16th to May 26th.

The music lovers and those who enjoy peppy dances will be delighted to have these clever musicians here this summer. They all are clean, likable young men and are very welcome in our midst. We predict for them a successful and pleasant season at the Music Box.

Secretary Mellon denies rumor that he will quit as treasury head.—Milwaukee Journal.

Michelson Memorial Church

John Wilfred Greenwood, Minister

Sunday, June 2, 1929

10:30 a. m. A special service for the men who like to fish. The theme for this service will be, "The Luck of Fishermen." An address by one who likes the sport.

7:30 p. m. A sermon continuing the series on "The Place of the Church." "The confusion of the church and her need of the confessional."

Ruts

"It was at best, a disheartening experience. Another car was coming from the opposite direction. It was urgent that I get my car out of the trail. But the ruts were too deep. No matter how strenuously I tried, it was of no avail." So writes a modern motorist, after he had had a head-on collision.

And the power of ruts to hold us in places where we do not want to be, is all too evident in the mental field. Men get in the habit of thinking thus and so their tragedy soon becomes that of the closed mind. The closed mind of the militarist insists that since we have always had wars, we must always have wars. The closed mind of the industrialist insists in a similar vein that the competitive system is here to stay. The Nordic superior being insists that his civilization is the higher, forgetting that the last war is no compliment to our superiority in anything.

To face this large group of our citizenship is to be aware of the significant value of the statement of a Carlyle when he said "Death is the friend of progress" and to feel an urgency in arranging the funerals of those who in fatalistic fashion, block the wheels of development. To quote Eastman, as he listens to the old crop of statesmen harangue on the use of gas, and planes in the NEXT WAR, is to agree to the fact, "most of these delegates belong to an order that MUST pass. Their mental ruts are too deep."

HOW THEY ARE TRAVELING

The number of vehicles passing over the highways of this community Sunday, May 19th is as follows:

Grayling to Lake Margrethe...407
Grayling to Kalkaska...79
Grayling to Roscommon...631
Grayling to Higgins Lake...99
Grayling to Frederic...785
Frederic to Lovells...191

What is a great surprise to us is the toll of the Kalkaska road—M-76. Seventy-nine cars went over that highway in spite of its rotten condition. That is a road that is badly needed, and should be substantially improved this summer.

FUNERAL OF RASMUS JORGENSEN HELD FRIDAY

Funeral services for Rasmus Jorgensen were held Friday afternoon at the Danish-Lutheran church at 2:30 o'clock, Rev. Kjolhede preaching an impressive sermon. The remains were laid to rest in Elmwood cemetery, the following old Danish friends acting as pallbearers, Rasmus Rasmussen, Johannes Rasmussen, Peter Hanson, Olaf Sorenson, Chris Hemmingson and Walter Hanson.

Those from out of the city who came to be in attendance at the funeral were Mr. and Mrs. Ralph Warner and daughter, Miss Helga and Benny Jorgensen, Mrs. Carl Kripke and Mrs. Axel Sorenson, Detroit; Mr. and Mrs. Ernest Jorgensen, Birmingham.

Rasmus Jorgensen was born April 26, 1847 in Odense, Denmark. He grew to manhood in Odense and in 1875 was married, his wife passing away in 1897. Two children were born to this union, a son and daughter, who reside in Copenhagen. The following year Mr. Jorgensen again married, this time to Dorothea Mortenson and two children were born in Odense, Elsie and Benny. In 1902 they came to Grayling from Denmark and a son and daughter, Helga and Ernest, were born here. In Denmark Mr. Jorgensen was employed as a mail carrier for 24 years and took part in the social activities of the town and was leader of the N.I.O.G.T., a group of young peoples societies, for eight years.

On coming to Grayling he was employed by the Salling Hanson company and remained in their employ until two years ago when he was forced to give up his work owing to being troubled with his eyes. He took suddenly ill on Sunday, May 19th with a paralytic stroke and passed away two days later, Tuesday evening, at his home.

Mr. Jorgensen was a good citizen and very loyal to his family and friends, and the family have the sympathy of many friends in their bereavement.

A Japanese boy in New Jersey defeated eighteen thousand American pupils in a spelling match. But this isn't surprising. If you will examine a few Japanese words you will realize that Japs have to be good spellers.

COMING

Dr. A. S. Allard, Optometrist of Bay City will be in Grayling at Shoppenagons Inn, Wednesday afternoon, June 12.

Eyes examined and glasses fitted that give results at reasonable prices. Childrens eyes a specialty.

Remember the date, Wednesday afternoon, June 12.
DR. A. S. ALLARD,
Optometrist.

THE WEEK IN WASHINGTON

(By Congressman Roy O. Woodruff)

Since my letter of a week ago, the House has completed its general debate on the tariff bill, and before this is published, will have passed it by a substantial majority.

The bill as reported from the Ways and Means Committee was unsatisfactory to the Representatives from some of the Agricultural States, and as a result these Representatives, of which I was one, appeared before the Republican members of the Ways and Means Committee and urged a further increase of tariff on certain agricultural products. We were able to convince the Committee this should be done and these increases will be made in amendments to the bill while it is being read under the five-minute rule for amendment.

Anyone familiar with the facts will concede that his Tariff Bill is one that is drawn in the interests of the American farmer. I have always maintained that the man on the farm has for years been voting a tariff commensurate with its needs, without having been given the same consideration himself. In my opinion this bill at last puts the American farmer, so far as the tariff is concerned, upon the same economic basis as the man in the city.

The increase in the tariff on sugar will automatically give to the farmer an increase in the price he receives for the growing of beets, and this holds true of all the other items.

The bill is one which should meet the unqualified approval of everyone interested in a prosperous agriculture.

Hoover cuts receptions to one a week; President dislikes handshaking.—Pittsburgh Press.

CARD OF THANKS

The family of the late Mrs. Frank R. Deckrow acknowledge with grateful appreciation the kind expressions of sympathy in their recent bereavement.

NOTICE

The restriction of parking on gravel between pavement and curb on Michigan Avenue has been removed. Please do not park on the pavement but park instead on the gravel. Continued use of the gravel in this way will pack it down and make it firm.

50 TAGS NOW RECEIVED BY CONSERVATION DEPARTMENT

Metal tags taken from some of the 5,000 trout tagged last October by the fish division of the conservation department are being received daily. About fifty of these tags have now been mailed in. Jan Metzlaar, Biologist of the fish division, says that in the majority of cases information received with the tags indicates that the fish have grown from one to two inches during the intervening eight months.

BAY CITY PARTIES FINED

The "Ben Bow" a Saginaw Bay commercial fishing boat owned by the Cavanaugh Fish Company of Bay City has been confiscated by the conservation department and its operator Clifford Smith fined fifty dollars and costs of \$8.50, when conservation officers discovered perch taken during a closed season and undersized pickeral in his possession concealed in the "Ben Bow."

Local Happenings

The Girl Scouts will give a bake sale at the Nick Schlotz grocery next Saturday, June 1st, beginning at 12:00.

How's your old straw hat? Our new ones are fine, at just half the regular price. Cooley's Economy Store, next to bakery. Priced 15c to 50c.

The Grayling-West Branch ball game last Friday ended in a one-sided score of 18 to 6 with Grayling on the long end. A report of the game appears in the school notes.

Mrs. Hanson R. Bay of Corvallis, Montana, who has been visiting in Denmark for the past couple of months is sailing from Denmark today and returning to her home in Montana.

A daughter was born to Mr. and Mrs. Oliver Shoemaker of Brighton, Mich., May 19th. This little Miss weighed 9 pounds and is named Gertrude Arlene. Mrs. Shoemaker was formerly Miss Gertrude Wakeley, daughter of Mr. and Mrs. Seeley Wakeley.

The program for Memorial day as arranged by Grayling Post 106 was planned to start at 9:00 o'clock with services being held at Frederic. In Grayling 10:00 o'clock was the hour, and in the afternoon the boys made plans to go to Roscommon to take part in their program.

Mr. and Mrs. Hugh Oaks and sons Ralph and Harry paid Mrs. Oaks' brother, Forrest Wilcox, a brief visit at Indian River before returning to their home in Flint Monday. They had been here to attend the funeral services of Mr. Oaks' sister, Mrs. Deckow.

Bob's Place is the name of the new eating place in Grayling that will be opened Saturday to the public by Mrs. J. E. Bobenmeyer. The location is the old Goupil house on U. S. 27, that has been remodeled and redecorated inside and made into one of the most inviting places. With pretty green drapes and the color scheme of green and ivory carried out in the wall decorations and floor covering the place is very attractive and cheery. Mrs. Bobenmeyer is an excellent cook and no doubt will get her share of patronage.

The Seniors made a real hit with their audience in the play "Clarence," given at the school auditorium last Friday night. It was put on under the direction and coaching of Principal LaVerne Cushman. It was well directed and every part well taken. The young people deserve a lot of credit for the graceful and pleasing way they took their parts. As usual with school plays, there was a good attendance. One of the hits of the evening was the Luke and Hiram dialogue given by Will Garner and Elmer Fenton. Their witty cracks and ringing specialties drew a lot of applause.

If Grayling wins the baseball game with Gaylord Saturday they will have clear claim to the state championship. Already they have won five straight games with an average of sixteen runs per game to their opponents four, and their batting average is .572, which goes to show that they are heavy hitters. For some of the team it is their first year and they are doing remarkably well. Saturday will be the big game of the season as they won at Gaylord recently by a 4 to 2 score, and no doubt the Pineapple City bunch will make them work every minute. The game will be called at 2:30 and the team would appreciate the support of the public. Admission 25c.

Painted Ladies in Vogue

Painted ladies will be in the mode this summer. Red, orange, blue and green, will be the most popular color schemes that will be worked on chiffons, linens and silk. The picture shows a coat of natural linen painted in futuristic designs, over a frock of silk.

2 crushed to death at ball game in New York; sudden rain causes stampede at Yankee's park; many ball fans suffer injuries in wild scramble for exit.—New York Times.

MUSIC BOX OPENS DECORATION DAY

The Music Box, formerly Collen's pavilion, at Lake Margrethe opens for the public Decoration Day. This is the same old place but with a new dress and new interest, and under new management.

To entertain and amuse, a good place to rest and refresh yourself, and a place where you can meet your friends; a place where you can forget your troubles and your cares, where cooling breezes off Lake Margrethe cools the fevered brow.

Don Cox's Teacotians will furnish the music. Besides being good musicians they are pleasing entertainers and all who visit the Music Box are assured of a good time.

Clarence Johnson, under whose management the place will be operated, says it will be their prime effort to make their guests happy. "All rough stuff will be prohibited. People of refinement may come here with assurance that they need fear no embarrassment."

There will be dancing every Wednesday, Friday and Saturday during the month of June and every night except Mondays and Tuesdays during July and August. Dancing at 9:30 p. m. Park plan dancing.

PLAN MEMORIAL TO LUMBER INDUSTRY IN HURON NATIONAL FOREST

(By E. M. T. Service)

A group of prominent former Michigan lumbermen and descendants of former lumbermen met at East Tawas, Friday, May 24, and after selecting a site in the Huron National Forest overlooking the historic AuSable river decided to erect thereon a memorial to the Michigan lumbermen of the old timber days. The memorial will have as its dominant motif a heroic statue of a lumberjack or a riverman a granite or bronze shaft with bass reliefs of old-time figures, implements and timber in the different stages of the lumber industry or a high campanile. The site selected was at Five Channels Dam, 200 feet above the AuSable and close to the historic Thompson Tote Trail, and the Kiwanis Forest.

Those present representing the old and present lumbering interests were: W. B. Mershon, Saginaw; T. W. Hanson, Grayling; John W. Blodgett, Grand Rapids; C. Rust Macpherson, Saginaw; Charles T. Mitchell, Cadillac; George L. Burrows, Saginaw; H. E. Fletcher, Allan M. Fletcher and Robert Rayburn, Alpena.

Those present visited many places in the 300,000-acre forest and saw the process of reforestation from the planting of seedlings to the growing of trees on some of the 30,000 acres under cultivation, the oldest of which is 18 years of age. The reaction of the visitors was expressed by Mr. Mershon when he said, "I am glad to see what norways are doing on what I was lead to believe was worthless soil."

After the forest visit a formal meeting was held at which W. B. Mershon was chosen chairman of a general committee which will have in charge the erection of the memorial. John W. Blodgett was chosen chairman of a committee to select the form of memorial, engage craftsmen for its creation, etc. Mr. Mershon was chosen chairman of a finance committee. Mr. Mershon said that correspondence which he has had on the subject with 60 or 70 families in all sections of the country guaranteed the success of the project.

The decision regarding the site was

influenced through the fact that the site overlooks the AuSable river, is the center of a U. S. Federal Forest of 800,000 acres which will insure its perpetuity.

The East Tawas Chamber of Commerce entertained the visitors with a dinner. Each of the visitors planted a tree in the old Thompson Trail. Before adjournment, a resolution, presented by T. W. Hanson, commending R. G. Schreck, forest supervisor, for the work which he has done, "which was a revelation to the visitors," was unanimously adopted.

TROUT EFFECTED BY TEMPERATURE

Like all life, the game fish of Michigan and especially the trout are effected by the temperature of their environment. To what extent and how this factor can be controlled by human agency is told in the following story by Mr. Jan Metzlaar, Biologist of the fish division of the Department of Conservation.

"Hundreds of millions of young trout have been planted into the streams of Michigan by the department of conservation. When this work was first begun many years ago little attention was paid to the individual character of these waters; but around 1922 the foundation was laid for a general survey of our Michigan trout streams. This resulted in the working out of methods for their proper stocking. Each surveying party was expected to describe conditions as they found them, that is: the stream and the changes effected by human agencies such as lumbering, dredging, damming, agriculture, and various forms of pollution.

"The next step after a study of these conditions will be recommendations as to the establishing of the best environment for trout and trout fishing.

"Under Michigan conditions the outstanding factor affecting trout life is the temperature of a stream. This is influenced by lumbering, dredging, damming, agriculture, etc. There is a common notion abroad that the temperature of a stream should be as low as possible for trout and that the fish would thrive best in ice water. This is a fallacy. The trout which we have in Michigan do not thrive at all in the Arctic or in glacier-fed mountain streams. It is true that they shun the high temperature of our lowland waters, but it is equally true that they shun extreme cold. We find that our various species thrive best where conditions are such that the day maximum does not exceed 68 degrees Fahr. If on hot summer days the temperature rises above that, the trout look for holes and places where spring seepage or colder creek water comes in. If, on the other hand, the trout were planted in a very cold creek running into a slightly warmer water. This downstream migration seems primarily to be a matter of food, as the food production of a stream depends very greatly on the temperature.

"In small, cold, spring-fed creeks young trout find few enemies; but at the same time there is a comparative scarcity of food. In the warmer streams there is more food but also more enemies. "These basic facts are well known in a general way; the main question is: to what extent can the trout utilize the food supply in different streams? This subject can be approached in two ways. First by examining the scales of trout from different streams and finding out their

age. By comparing this with the sand ramparts and protected from varying conditions can be computed. Second, a more direct method can be used whereby the amount of food consumed by trout of varying lengths in streams of different temperatures can actually be measured. For computation an enormous number of trout stomachs from different streams and temperature records taken faithfully over long periods will be required.

"By comparing these data for the

main trout streams many worth while things can be found out about them. If a certain stream in the north is found to be comparatively cold and the trout in that stream constantly eat and digest less food and consequently grow less than their brethren in a slightly warmer stream, the water temperature may be raised by the construction of small dams, creating trout ponds, or by the introduction of beaver on the head waters of the stream and its tributaries—provided that there are no objections to the introduction of beaver. It must be remembered, however, that in the north the temperature may be raised too much because of the introduction of too many beaver. On the other hand most of the trout streams south of the Grand Saginaw Valley are very short. Many of them are supplied with sufficient cold spring water, but they quickly lose their character as trout streams because the temperature raises too high as a result of exposure to the heat of the sun.

"Because of the varying temperature factor in these valuable trout streams their reconditioning is a more fundamental line of work than planting, as the production of a stream depends not only on stocking with certain species of fish, but also largely on the conditions under which these fish must live in the streams.

"The temperature of southern trout streams could be more or less effectively controlled by the planting of a fringe of brush and small trees along the banks. The cooperation of all the people concerned is indispensable to obtain favorable results. "Throughout the southern tiers of counties from Berrien and Van Buren to Jackson are scattered small trout streams. They are short and stunted but heavily fished, and mile for mile they are among the most valuable streams in Michigan. Many of them have been at some time ditched and the dirt ramparts still remain on both sides of the stream. Often beautiful, clear water is round with lots of cress, but a quickly rising temperature, too high for trout. All these streams require shade. To provide this shade, brush and small trees should be planted along the

Go to the owner of a new All-American for the facts about this car

If YOU want to know the real facts about the New Oakland All-American . . . and who doesn't, now that it is gaining such a name for style, performance and dependability . . . go to some one who owns one. Let him tell you what he thinks of the car. . . Then come in for our special demonstration. Let us show you what complete motoring satisfaction the New Oakland All-American holds for you.

Price \$1145 to \$1375, f. o. b. Pontiac, Michigan, plus delivery charges. Spring covers and Lovejoy Hydraulic Shock Absorbers included in list prices. Bumpers and rear fender guards extra. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values . . . Oakland-Pontiac delivered prices include only reasonable charges for delivery and financing.

PRODUCT OF GENERAL MOTORS

age. By comparing this with the sand ramparts and protected from varying conditions can be computed. Second, a more direct method can be used whereby the amount of food consumed by trout of varying lengths in streams of different temperatures can actually be measured. For computation an enormous number of trout stomachs from different streams and temperature records taken faithfully over long periods will be required.

"By comparing these data for the main trout streams many worth while things can be found out about them. If a certain stream in the north is found to be comparatively cold and the trout in that stream constantly eat and digest less food and consequently grow less than their brethren in a slightly warmer stream, the water temperature may be raised by the construction of small dams, creating trout ponds, or by the introduction of beaver on the head waters of the stream and its tributaries—provided that there are no objections to the introduction of beaver. It must be remembered, however, that in the north the temperature may be raised too much because of the introduction of too many beaver. On the other hand most of the trout streams south of the Grand Saginaw Valley are very short. Many of them are supplied with sufficient cold spring water, but they quickly lose their character as trout streams because the temperature raises too high as a result of exposure to the heat of the sun.

"Because of the varying temperature factor in these valuable trout streams their reconditioning is a more fundamental line of work than planting, as the production of a stream depends not only on stocking with certain species of fish, but also largely on the conditions under which these fish must live in the streams. "The temperature of southern trout streams could be more or less effectively controlled by the planting of a fringe of brush and small trees along the banks. The cooperation of all the people concerned is indispensable to obtain favorable results. "Throughout the southern tiers of counties from Berrien and Van Buren to Jackson are scattered small trout streams. They are short and stunted but heavily fished, and mile for mile they are among the most valuable streams in Michigan. Many of them have been at some time ditched and the dirt ramparts still remain on both sides of the stream. Often beautiful, clear water is round with lots of cress, but a quickly rising temperature, too high for trout. All these streams require shade. To provide this shade, brush and small trees should be planted along the

DIPPING INTO SCIENCE

Mexican Jumping Bean

A Mexican tree develops a three-cornered pod, in one of which an insect egg develops. When it hatches it coils and hurries itself against the side of its "house," carrying the house with it. Thus it is not the bean that jumps but the insect inside it. Thus it sleeps in cold weather but becomes active with heat. (© 1929, Western Newspaper Union)

KONJOLA BLAZES ON MAMMOTH SIGN ON BOARDWALK OF ATLANTIC CITY!

The Mosby Medicine Company, Cincinnati, Ohio, producers of Konjola proprietaries which are advertised in more than 900 daily papers in the United States, has just completed, in Atlantic City, the largest Neon tube and electric bulb sign in the world, at a cost of \$117,000. This huge sign, which it is estimated that 20,000,000 visitors to the world-famous boardwalk will see each season, is 81 feet high and 84 feet long. This striking sign, mounted on the Central pier, is visible for blocks down the walk and beach. It contains over five miles of wire, 675 feet of luminous tubing and 3319 light sock-

ets, and is regarded as a master-piece both for its beauty and its attraction value.

"This splendid sign," says G. H. Mosby, president of the Mosby Medicine Company, "is, after all, a tribute to the power of newspaper advertising. Without the amazing results secured by liberal use of the daily press, as an advertising medium such an investment in a sign would be totally out of the question. This sign, it is figured, will tie up the newspaper advertising in a thousand cities and towns. The tourist or vacationist from Florida, Iowa, New York, and a score of other states, visiting Atlantic City, will feel like he is meeting an old friend when he sees 'KONJOLA' flash before his eyes, for Konjola is rapidly becoming a household word throughout the land."

Interesting Events In Grayling 23 Years Ago

INTERESTING ITEMS OF NEWS GATHERED FROM THE FILES OF THE AVALANCHE OF 23 YEARS AGO.

Thursday, May 31, 1906
Born to Mr. and Mrs. Anthony Nelson, May 24th, a daughter.

Mrs. Hennessey of Maple Forest is visiting her brother, Hugh Oaks.

Mr. Oaks is enjoying a visit from his father of Chicago.

Born to Mr. and Mrs. James Murphy, May 26th, a son.

Mr. and Mrs. H. C. Mortensen are entertaining their daughter, Mrs. Adelbert Alderton and grandson, Charles Frederic of Saginaw, for the week.

The game of base ball, yesterday afternoon between the Athletic club and the West Branch club, was the opening game on their new grounds, the score was 25 to 0, in favor of our boys. We think that it would have been better if you had let the other club score a few runs. Why so cruel?

Mrs. A. J. Stilwell's mother is failing rapidly.

Born to Mr. and Mrs. Robert Perry, May 28, a daughter.

Arthur Fournier left Tuesday morning for a ten days stay in Detroit.

Mrs. L. Fournier has been visiting friends and relatives in Detroit for the past two weeks.

Edward Fisher and family, now of Madison, Wis., are visiting the family here, for a few weeks.

C. J. Hathaway, our local optician and jeweler, is in Detroit this week purchasing new stock.

Mabel Redhead and Mabel Crandall are back after a long absence, both are looking better.

Invitations have been received for the wedding of Miss Neva Benson, formerly of this village, now of Owosso.

The Michigan Central is relaying the Mackinac division with new heavy steel rails between Frederic and Gaylord.

Mr. Park Forbes while driving along

Spruce street, Monday, the horse started suddenly and threw him out of the wagon, the wheel passing over his face, injuring him quite badly.

Miss Laura Nelson has returned from Detroit, where she was stenographer, and accepted a position in the bank here.

The reception in honor of Mrs. Benkelman, by the Good Fellowship club was indeed a success and greatly enjoyed by all.

Word was received from O. Palmer and wife, that they were in East Aurora, on Saturday. They arrived home Tuesday night.

I have added a large fleet of fine steel rowboats to my boat livery at Portage Lake, and am prepared to give first class service in that line.—J. J. Collen.

The fire alarm last Friday called out the fire department to the Burton House barn, the fire was soon extinguished. Supposed to have caught from a passing train.

Deputy sheriffs Clark and Brown, made a raid on the hobo camp Sunday night and nailed five of the Weary Willies. A few more such raids as that and the hoboes will give Grayling a wide berth.

The party given by the young people last Friday evening at the opera house was a success. The music by Mr. Clark and Miss Hadley was fine. Lunch was served next door by Mrs. Schmidt, and all had a very good time.

There was quite a little excitement at the school house one morning last week, when it was thought the basement was on fire. Papers had accumulated in the furnace which were set on fire but it did not draw well and the smoke poured out of the windows. The children made a hasty exit.

Once upon a time a woman who lived in a town called Grayling, thought herself a sure marksman. It could not truthfully be said of her

that she could not hit the broad side of a barn, for in aiming at a cat on the fence, she hit a neighbor's house and the bullet was found on a bed. If you want to know what became of the cat ask Mrs. R. W. Brink, Grayling, Mich.

Is the best town in Northern Michigan. It has telephone, electric lights, cement pavements, shaded streets, fine private homes; county seat of Crawford county with modern court house, jail, sheriff's residence, splendid high school, opera house, six churches, about 20 civic societies, band stand, Court house park, regular weekly summer concert, over 50 business places, including 4 groceries, 2 dry goods stores, 2 meat markets, 2 hardware stores, 2 drug stores, furniture store, shoe store, newspaper, one of the largest sawmill and lumber plants in the state, mammoth hardwood flooring plant, big dowl factory, numerous smaller manufacturing plants, 2 blacksmith shops, cigar factory, thirst parlors, hotels, restaurants, notion stores, doctors, lawyers, preachers, one Indian chief (a corker, too). It is a freight division on the Michigan Central R. R., big round house, freight yards, etc. Railroad connections east, west, north and south. Telegraph and express facilities the best. Long-distance phone, mail ten times daily. Good people—about 2,000 of 'em. We want more, too; opportunities and work here for more. Located on both banks Ausable river, picturesque, and best trout stream in Michigan. School Section Lake 1 mile; Portage Lake 3 miles—beautiful body of water with plenty of bass, pike, etc., charming scenery. Purest drinking water—healthiest climate—no hot summers. In fact, a good place to come. Try it.

Crawford County
Is one of the best counties in the state for fruit raising, stock raising and general agriculture. About half heavy hardwood land; balance gravelly loam to light sand—all productive. Sparsely settled, but filling up fast. Well watered, no drouths. Lakes, springs and streams of pure water. Health and pleasant climate. Cheap lands now—\$1.50 to \$20.00 per acre. Good markets. Schools, churches, roads. Farmers now here up-to-date, wide-awake and prosperous. Need more of 'em. Have big Cleaner and Grange organizations. Good railroad facilities. Plenty of work at good wages winter and summer. Raise all kinds of fruit, vegetables, grains, stock. No malaria. Investigate. Write any of our business men.

Objected to Shaving

by Monkey Apprentice

Mr. Harry Bauer is fond of telling the following story:
The barber, an old Irishman, with a large, hairy head and particularly ugly monkey, which he presented to his father. The barber trained the monkey to assist him in the lathering of his customers' chins, much to their amusement.

One day a stranger dropped into the shop, and had a good look at the monkey sitting in a far corner staring intelligently at a comic paper. By and by the barber was called to the door to answer some query or other, and in his absence the monkey seized the lathering brush and proceeded to work diligently on the customer's face. Afterwards he grabbed a razor and started to strop it with equal diligence, but in a grossly careless manner. Then he clambered up on the arm of the chair and made as if to begin shaving the alarmed customer.

"No, na, ma wee mangle!" said the latter, jumping to his feet and pushing the monkey aside. "I've no objections to ye soapin' me, an' yer stroppin' maybe a' richt, but yer father'll hae to do the shavin'!"

Eskimo Musicians Not Enthusiastic About Jazz

The Eskimo must be the great music-lover. It is said of him that he will sit on his native ice for hours listening to the graphophone. His own music he makes on an instrument which consists of a skin tightly stretched over the frame of a hoop—half drum and half tambourine. Eight players of eight of these instruments make an Eskimo orchestra. With each man striking the one note of his instrument with a rod, the eight notes of the octave are produced. Also, the musician sings as he plays. Needless to say, the people nourished on this music are amazed by the more civilized music, and it is said of them that they greatly appreciate graphophone records of singers. Strangely enough, too, they prefer most other music to jazz.

Antique Dealers' Tribunal

One of the strangest tribunals in England sits at regular intervals in a upper room in St. James' street West, in the center of the great art world of London. It is the antique dealers' "High Court of Justice," to which any of the 550 members of the British Antique Dealers' association has the right to appeal. Its judges, who sometimes number as many as 20, include some of the world's greatest experts on precious stones, old china, tapestries, pictures and antique furniture. Disputes arising out of the sale of an antique of more than ordinary importance are often referred to the court for arbitration, and if they think fit, the judges have the right to call in independent art experts. It is to protect the interests of antique dealers and safeguard the honor of their industry that this tribunal has been established.—Hartford Courrier.

The Prize "Howler"

The prize "howler" must surely be attributed to the boy who suggests that "the Kodak is the Bible of the Mohammedans." Here are others:
"A fissure is a man who sells fish."
"The dome of St. Paul's is supported by eight peers, who are unfortunately cracked."
"A bilizard is the inside of a duck."
"Equinoxes are the inhabitants of Greenland."
"Bacchus first taught the Greeks to get drunk."
"Apollo was the king of table waters."
"Shakespeare lived at Windsor with his merry wives."

Everybody Puss-Footing

As street traffic noises become worse and worse in the large cities, the pedestrian becomes still quieter in his movements, by the use of rubber soles and heels.
Even in Lancashire quietly padding rubber and leather steadily replace the clatter of clogs and wooden shoes. The silent shoe is a modern notion. Noisy boots were formerly something to be proud of. The gallants of Alexandria let people know when they were coming, the London Macaroni of the Eighteenth century wore heel-tips that clucked, and a Northampton boot manufacturer says that some of his West Indian orders used to stipulate that the boots must squeak!

Says Cohn Found Bacteria

That Dr. Ferdinand Cohn, the botanist, and not Robert Koch, the chemist, was the discoverer of bacteriology, was brought out in Germany during the recent celebration of the centenary of Koch there. Cohn is said to have examined the frontier regions between plant and mineral. Then came his investigations of the bacteria. He discovered a number of mysterious carriers of sickness and grouped them into a system. He influenced a young physician to pursue his scientific studies in bacteriological research. The young physician was Koch.

Tonsorial Note

"I hear that Louie is going to marry Joe the barber's daughter. Is there money in it?"
"Yes, her old man has been scraping in the money for the last twenty-five years."

Slighted

Mrs. B. was telling her husband all about a funeral she had attended that afternoon. Mary Ann, age five, was a silent though interested auditor. "A funeral must be very like a party, she decided, with all the discussion of flowers and people and so on. "And the little pallbearers looked so sweet," her mother was saying. Mary Ann, silent no longer, exclaimed: "Pall-bearers, 'pall-bearers,' why didn't you bring me some?"

ON DISPLAY SATURDAY JUNE 1ST

A NEW SIX AT A PRICE WITHIN THE REACH OF MILLIONS

On Saturday, Buick will present the new Marquette—designed by Buick engineers and built in Buick factories. Marketed as an additional member of the Buick family, it will in no way affect Buick itself. Buick will continue to express the policies that made it the leader of the fine car field for the past quarter-century. In the smart, comfortable bodies of the Marquette you will recognize the fine

hand of Fisher design. In its balance and poise you will see experienced engineering. And in performance—that final standard by which all cars are judged—you will find the Marquette leading its price class by an impressive margin. Be on hand when this eventful new car is shown Saturday. See what a remarkable new automobile Buick has produced at a price within the reach of millions.

Wooden Indian Signs

John L. Morrison, editor, and a collector of wooden Indians, says: "Wooden Indians are not indigenous to American soil. As early as the reign of James I the wooden Indian was a familiar sight in England. Of the early wooden Indians in America, an odd cupidlike Pocahontas that once stood guard on Hancock street, Boston, dates from 1780. The pioneer authenticated appearance of a cigar store show figure was in 1770, when Christopher Demuth opened a tobacco shop in Lancaster, Pa. This figure was not an Indian, but a delicate, minut-type gentleman extending a snuffbox invitingly."

Took Soda 20 Years For Gas--Stops Now

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—J. B. Hardy.

Adlerika relieves stomach gas and sourness in TEN minutes. Acting on BOTH upper and lower bowels, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleansing and see how much better you feel. It will surprise you!—Mac & Gidley, druggists.

If you want to know just how little the ice man thinks of you socially, buy yourself an iceless refrigerator.

BUYS BIGGER AIRPLANE

Standard Oil Co. (Ind.) Replaces the Famous Stanolind with Finer, Faster Stanolind II., to Be Used for Company Transportation and as Flying Laboratory.

A giant new airplane, all metal, tri-motored, and carrying nine passengers, has just been delivered by the Stout Division of the Ford Motor Company to the Standard Oil Company (Indiana), according to announcement by Allan Jackson, Vice President, speaking for the Directors of the latter company, from its offices at 910 South Michigan Avenue, Chicago. It has been christened "Stanolind II."

The original STANOLIND was the first giant passenger plane to be purchased by an industrial organization for use in its business. Although originally ordered in June, 1925, it arrived in Chicago from Detroit on the same day, and almost at the identical moment that Lindbergh landed in Paris, May 21st, 1927. During the twenty months of service before it was sold for the buyer, Finer, and speedier STANOLIND II, it traveled upwards of 81,000 miles, carrying nearly 6,500 passengers, the great majority of whom had never before flown in an airplane. That the Directors of the Standard Oil Company (Indiana) believe in the safety and advantages of this form of transportation is shown by the statement that the joint mileage of the Directors totaled 87,458.

STANOLIND II is equipped with three Pratt & Whitney "Vasp" motors, each of 410-horse power, giving it a high speed of 140 miles, and a cruising speed of 115 miles per hour. It can go to a 20,000 foot ceiling, and with its gasoline capacity of 855 gallons stored in three tanks in the wings, fly 630 miles without refueling.

It has an overall length of 49 feet 10 inches, and an overall span of 77 feet 10 inches, giving it a wing

area of 835 square feet and a gross load capacity of 18,250 pounds. As the weight of the plane and three motors is 7,894 pounds, it leaves 5,356 pounds available for carrying of crew, fuel, and passengers. The actual passenger and baggage capacity is 2,611 pounds, but as the Standard Oil Company (Indiana) officials believe in excess safety factors, the plane will not be permitted to carry a gross load of more than 2,025 pounds, which represents nine 200 pound passengers and 25 pounds of baggage for each. Seating capacity is provided by adjustable reclining chairs in the 16-foot cabin, which is 4 1/2 feet wide and 8 feet high.

Provision is made for amply heating the plane during cold weather. It is electric lighted, has adjustable windows, and is equipped with two flares for emergency landing in case night flying is done, while in the cabin of the two pilots will be found both magnetic and earth inductor compasses, turn and bank and drift indicators, altimeter, speed indicators, and the usual navigating instruments for both day and night flying. At the rear of the passenger cabin is located the lavatory and toilet, the baggage being carried in compartments in the wings.

The STANOLIND II will remain in Chicago for a week or ten days before going into active service.

Just another good thing added to the other good things of life

CAMEL CIGARETTES

WHY CAMELS ARE THE BETTER CIGARETTE

Camels contain such tobaccos and such blending as have never been offered in any other cigarette.

They are made of the choicest Turkish and American tobaccos grown.

Camels are always smooth and mild.

Camel quality is jealously maintained . . . by the world's largest organization of expert tobacco men . . . it never varies.

Smoke Camels as liberally as you choose . . . they will never tire your taste.

Nor do they ever leave an unpleasant after-taste.

© 1935, R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

Years of service in MODEL T FORDS

THE Model T was so strongly and sturdily built that it is still rendering reliable, economical service to motorists in every section of the country. Millions of these cars can be put in shape for two, three and five more years of use at very small cost.

So that you may have this work done economically and satisfactorily, the Ford Motor Company is still devoting a considerable section of its plants to the manufacture of Model T parts. It will continue to do so as long as they are needed by Model T owners. The following list gives the approximate labor charges for reconditioning the Model T Ford:—

Engine	
Tune motor (including replacement of commutator case, break and vibrator points if necessary)	\$1.00
Grind valves and clean carbon	\$3.75 to 4.00
Overhaul carburetor	1.50
Rebush detachable car transmission bands	1.50
Install new pistons or connecting rods	6.00
Tighten all main bearings	6.00
Overhaul motor and transmission	\$20.00 to 25.00
Rear System	
Replace rear axle assembly	2.50
Install universal joint	3.00
Rebush brake shoes	1.50
Replace rear axle shaft, drive shaft pinion, or drive gear	5.00
Overhaul complete rear axle assembly	\$5.75 to 7.00
Rebush spring and perches	1.75
Oil and graphite springs	3.00
Front System	
Overhaul front axle	\$4.00 to 5.00
Rebush spindle bodies and arms (both sides)	2.50
Replace or straighten spindle connecting rod	.75
Tighten radius rod or steering ball cap	.60
Tighten all sockets and joints of front end	1.50
Replace front spring tie bolt or new leaf	2.50
Straighten front axle	3.00
Chassis	
Replace rear fender	1.75
Overhaul steering gear	3.50
Repair muffler	1.00
Overhaul radiator	7.50
Repaint Coupe	25.00
Repaint Sedan	25.00
Repaint Touring Car	20.00
Reupholster Runabout	8.00
Reupholster Touring Car	15.00
Replace top deck (Coupe or Sedan)	4.00
Overhaul starting motor	3.00
Overhaul generator	2.60

These prices are approximate and are for labor only, because the need and number of new parts depend on the condition of each car. The charge for these parts is low, however, because of the established Ford policy of manufacturing and selling at a small margin of profit.

FORD MOTOR COMPANY

TAKE IT EASY By Erwin Greer (President Greer College, Chicago, Ill.)

One of the most difficult things to do is to persuade the average driver of a car that he can spare a few minutes and not run at high speed all of the time. The sight of a car ahead of him is a perpetual challenge. For no reason in the world he is seized with a mad desire to pass that particular car, and then the one ahead of that, until he can brag to his friends how many cars he passed on the trip. The warning bell of a railroad crossing inspires a longing to dash across the tracks ahead of the train. But he doesn't always win.

Any effort to persuade him to stop along the wayside for a moment is utterly futile. For some inexplicable reason he must keep going.

The law of general averages, it is claimed, shows that motor car owners who drive at a steady, consistent rate of speed reach their destination just about as soon, and with much more safety, than the erratic "spury" driver.

Whenever some persons are at the wheel of a powerful car they court death by "whipping" out of line every time there is a break in the flow of opposite moving traffic. In the course of a few miles they may have moved up fifteen or twenty cars and gained a possible half mile in the line, but to do this they have taken fifteen or twenty chances of a smash-up, not only their own, but more often of the cars they are passing.

There is never a time when careful driving is more essential than when you "cut" around the car in front. The natural tendency is to pull across their path as soon as your steering wheel has passed their radiator. When this does take place, the other car has no alternative but to take the ditch. Many a fatal accident, listed as cause unknown, is really believed to have resulted from driving evils.

Then at the end of the trip the driver will proudly tell of the time in which he made the run. If someone were to ask him why, he probably would be unable to find an answer for usually there is no reason for such unseemly haste.

You really have time in life to enjoy yourself.

What is your hurry?

Slow down—and take it easy.

Civilization Defined

One in a million thinks; one in a thousand speaks; the rest follow. Civilization is not much more.—Dr. Inaz Nitobe, in "Japanese Traits and Foreign Influence."

The Care of Your Money

COMBATING SECURITY FRAUDS

In 1923, Horace J. Donnelly, United States Post Office solicitor, estimated that \$1,000,000,000 was lost annually in this country through blue sky promotions and wildcat schemes. In September, 1925, Deputy Attorney-General Oliver James of New York reported that stock frauds in New York State during that year had enriched swindlers by more than \$500,000,000. It was his opinion that New York State accounts for about half of the losses through worthless stocks. He likewise estimated the national loss to be in the neighborhood of \$1,000,000,000 annually.

Yet it seems generally agreed that the average citizen is becoming more and more educated in financial matters, more skeptical about get-rich-quick schemes, and more insistent upon investigation before investing. Commenting on this fact, the Better Business Bureau of New York City, in a recent review of five years of fraud fighting, says:

"Blue-sky promotions in radio, motion pictures, motor cars and oil, bucket shops, blind pools, false subscription rights, and reloading schemes no longer take heavy toll from the public. Flagrant offenses have become legally dangerous and big swindling operations are now so expensive as to be unprofitable for the most part."

Although improvement along investment lines is evident, the fact that even now a billion dollars a year is being thrown away through carelessness shows that there still is a great deal of education to be done.

The way to make sure that your investments are safe is not to "be ware of the glib salesman" but to so thoroughly acquaint yourself with the basic facts of safe and profitable investments that you can intelligently analyze and come to a decision about the security being offered you.

The "Care of Your Money" articles running in this newspaper week after week have been especially prepared by Straus Brothers Investment Institute to educate you along basic financial lines.

Read them, study them, keep them... remember the valuable information in them—and you will do much toward paving the way to financial success.

(If you have any financial questions to ask, Straus Bros. Investment Institute, Chicago, will be glad to answer them without obligation on your part.)

A prominent New Yorker predicts that in a few years they will be hanging men in America for taking a drink. But this won't be much worse than strangling on the liquor direct.

FARM POULTRY

DRIED MILK WILL HELP CURE CHICK

Part of Treatment for Flocks With Coccidiosis.

For chicks affected with coccidiosis, a diet rich in milk is one of the measures advocated for the cure and control of the disease, by the poultry husbandry department of the Ohio State university. Not that simply feeding lots of milk is a sure or complete control measure. It must be employed as one of the features of a general treatment of which sanitation and prevention are the outstanding practices.

In combating coccidiosis in a flock the poultry husbandry department recommends four steps, giving epsom salts at the rate of one pound to four gallons of water; confining the chicks to the brooder house or moving the house to clean soil so that there is no reinfestation from the soil; cleaning the brooder house thoroughly and disinfecting it every three days, and placing the chicks on a diet which is rich in milk.

Quick relief from a diet of liquid milk is not likely because the birds will not consume enough of it. In using dry milk, best results are obtained when the mash is composed of 40 parts of dry milk. No other source of animal protein should be used in the mash.

The following mixture has been found to give satisfactory results when fed as soon as the disease appears and kept before the chicks as long as it is in evidence: dry skim milk, 40 pounds; wheat bran, 10 pounds; yellow corn meal, 30 pounds; ground rolled oats or barley, 20 pounds.

Selection of Breeding Stock Helps Turkeys

One of the most important steps towards successful turkey production depends upon the proper selection of the breeding stock. Weak poults, small, scrubby turkeys and unhatched eggs are often traced to carelessness in the selection of the breeding stock. Turkeys that are used as breeders must possess those physical characteristics, showing strength and vigor. These characteristics are manifested as a general rule by a deep and wide body, the back broad and the breast round and full. The head shows certain physical characteristics of strength, namely: the eyes should be fairly short, broad and deep and of good size, showing a clean, healthy appearance. The legs of the birds should be well apart, showing a strong, sturdy shank and straight toes. Considerable emphasis should be given in the selection of the male bird: This in itself should improve the stock from year to year. Early hatched toms, as a general rule, are sufficiently matured to make good breeders the first season. One should avoid using the late hatched male birds for breeding purposes.

Oyster Shells Provide Right Source of Lime

Usually oyster shells provide a good source of lime for poultry. Quite often they are not broken up in sufficiently small parts. But they are cheap and when clean and not scattered in filth are safe. As a rule, they should be kept in clean self-feeders or places where they will not become contaminated. This will do most good when the birds are fed feeds containing vitamins, because lime is assimilated best in the presence of or when birds have the necessary vitamins to aid in digesting and assimilating it. If bone meal or healthy clean bones are crushed or ground and kept clean and wholesome, the good bone along with the vitamins will furnish lime and phosphate. But there are some things in the processes of digesting and assimilating lime that are not known. Yet we know poultry must have some form of lime in their feed. Lime and phosphate may be obtained from other animal tissues and from vegetables and grains.

Hatch Chicks Early

Much has been said for or against early hatching of chicks. It is a question that every breeder and producer will need to answer according to his own circumstances. In making the decision he should take into consideration not only the immediate convenience, but also the future usefulness of the birds. It is a fact that early hatched chicks are more profitable winter layers, the same as fall freshening dairy cows are the most profitable milkers.

Skim Milk for Hens

On many farms skim milk is used with stock that will not pay as great a return for its use as when fed to poultry. Most records indicate that it is worth more when fed to poultry than to any other class of live stock. In fact, more poultrymen are feeding different types of condensed milk, than all other classes of live stock. This indicates that poultry responds particularly well to milk feeding. The minerals in milk are also beneficial to the fowls.

Getting Up Nights

If Bladder Weakness, Getting Up Nights, Backache, Burning or Itching Sensation, leg or groin pains make you feel old, tired, peevish, and worn out why not make the Cystex 48 Hour Test? Don't give up. Get Cystex today at Mac & Gidley. Put it to a 48 hour test. Money back if you don't soon feel like a new, full of pep, alert, well, with pains alleviated. Try Cystex today. Only 50c.

WHAT IS CALLED CONVERSATION

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois

Mrs. Allen had been very unhappy at Bath when she and her husband with their friend, Catherine Moreland, as guest went down for a few weeks' holiday.

She had been very unhappy, indeed. I say until she met Mrs. Thorpe, an old schoolmate of hers whom she had not seen for years. Now she had someone to talk to, and at once the two old friends indulged in what they called conversation in which Miss Austin tells us "there was scarcely any exchange of opinion and not often any resemblance of subject, for Mrs. Thorpe talked chiefly of her children and Mrs. Allen of her gowns." Neither one expected or cared for any particular response from the other. It was quite sufficient that there was a listener who would not attempt to stem the flow of words.

What is called conversation is often only two people in juxtaposition each of whom has an opportunity to give a monologue upon his own particular and favorite topic, whatever that may be.

When Mrs. Paris has been out of town for a time and is back in her own house all she wants is a chance to tell about her trip. Let her get started and you can go about your business quietly and without your saying a word she will run on for an hour giving every detail of what she said and what they saw and what everyone did and thought. She leaps from one topic to another with the agility of a mountain goat and would be quite surprised if anyone should indicate that the vocal exercise in which she is indulging is not conversation.

Gregory has opinions—very definite and settled opinions which he is eager and glad to expound to anyone whose ear he can get for a few minutes. He drops into a group of men or he is invited to a dinner party, and immediately he takes matters into his own hands and begins what he would term a conversation with his friends. In point of fact it is an exposition. It is a discourse, it is an oration, it is a play of words in which Gregory takes all the parts. If you will listen to Gregory for a few minutes he will tell you exactly how the difficulties in which the farmer now finds himself can be amicably settled. He knows who is going to be the next President of the United States and why, and he has a solution of the problem of the unemployed which, if people would only listen to him, would put an end to strikes, labor riots, and general discontent. While Gregory is talking he expects rapt and undivided attention. He doesn't like being interrupted or questioned while he is engaged in what he calls conversation. Every community, every organization, every group of a half dozen gathered together has its monologue artist like Gregory who labors under the delusion that when he is monopolizing the talk he is engaging in conversation.

(© 1925, Western Newspaper Union.)

Man So Nervous Gets Sore When Spoken To

"It actually irritated me to have anyone talk to me, I was so nervous. Vinol ended this and I feel wonderful now."—Wm. Fahy.

Vinol is a compound of iron, phosphates, cod liver peptone, etc. The very FIRST bottle makes you sleep better and have a BIG appetite. Nervous, easily tired people are surprised how QUICK the iron, phosphates, etc. give new life and pep. Vinol tastes delicious. Mac & Gidley, Druggists.

Aids Protein in Wheat

Protein content of winter wheat may be increased one-third or more by application of sodium nitrate to the field when the wheat is heading, the Department of Agriculture says.

To Justin Wentworth, George K. Wentworth and Smith Brothers and Company a corporation, last grantees in the regular chain title of such lands or of any interest therein as appearing by the records in the office of the Register of Deeds of said County.

Henry Harris Gaudy, last grantee under State Tax Homestead deed. 5-9-4

FRENCH PRIZES TO AMERICANS

Cups Are Won by Essex in Endurance Runs Staged by Club

Europe was given another demonstration of the all-around performance of which American automobiles are capable when American entries carried off most of the prizes in the 2,780 mile tour of France organized by the Motorcycle Club of France. The tour, which was for both auto mobiles and motorcycles, consisted of nine-day runs of approximately 310 miles each, with intermediate days in the various provinces devoted to speed contests, hill climbs, starts with cold motors and other events designed to bring out the real qualities of the cars.

The Ansaido Cup for all-round performance, the most coveted prize in the competition, was won by an Essex driven by Andre Morel, a noted French driver. It finished without penalizations. Adding to the performance was the fact that a second Essex, driven by Lamy, also finished with a perfect score.

When "go" finds you gone

You don't have to beat the signal. It's just the quick flash of power from SHELL 400 "EXTRA DRY" that gives you the jump on the other cars. ... And you can keep ahead of them just as easily on the road. For SHELL 400 "EXTRA DRY" is an honest, clean-bred, hard-working gas that never thinks of quitting. Good for all it's got and likes nothing better than to give you a good time and hang up a new mileage record for itself.

STOP AT THE SIGN OF THE SHELL

Safe at any speed with Shell Motor Oil

You may never need to drive sixty miles an hour. But it's good to know you can. Shell Motor Oil has ideal body at all operating temperatures... provides full protection at all speeds.

Let the Shell Lubrication Chart be your guide to longer motor life. The familiar yellow and red service stations are convenient everywhere.

BURKE OIL CO., Grayling, Mich.

FEWER GALLONS— LESS LABOR

We want you to know how few gallons of Heath & Milligan DEPENDABLE Paint you need to paint your buildings.

To illustrate, we will say your residence measures 30x40 feet and 20 feet high:

Front	30 feet
Rear	30 "
One side	40 "
Other side	40 "

Multiply by height 20

140

2800 square feet.

Allow one-fourth for trimming, edge of siding, corner boards, cornice, gables, etc. 700 "

3500 square feet to paint.

Heath & Milligan DEPENDABLE Paint covers 350 to 375 square feet per gallon—two coats. Divide the total square feet—in this example, 3500—by 350 and you have 10 gallons.

Measure your own home and use the above example as a guide to determine how many gallons you need.

Let us deliver to you the few gallons of DEPENDABLE Paint you need. Satisfaction guaranteed.

Ask for a copy of our "How to Paint" Book. It is free.

News Briefs

THURSDAY, MAY 30, 1929

Today is Decoration Day. Mrs. Lorane Sparkes is taking the school census.

Mr. and Mrs. Peter Peterson are visiting relatives in Marquette.

Sigurd Johnson of Manistee visited at his home here over the week end.

Frank Whipple and daughter Miss Clara of Lansing arrived Sunday to spend a couple of weeks at their home here.

Mr. and Mrs. Ben Storey and children of Elmira spent the week end at the home of Mr. and Mrs. Frank Lydell.

Curtis Weaver of Johannesburg underwent an operation for the removal of his appendix at Mercy hospital Saturday morning. His mother Mrs. Alex Weaver is a guest at the home of her sister, Mrs. Dan Hoessli, during his illness.

Mrs. Spencer Holst and son Spencer returned to their home in Detroit after a pleasant two weeks visit with her parents, Mr. and Mrs. Chas. McCullough.

Mrs. Lucy Morency arrived in Grayling Sunday to spend the summer in her own home here. She had been with her son and daughters in Detroit since last fall.

Girls Rayon school dresses, 75c at The Economy Store, next to bakery.

Mr. and Mrs. Martin Ackers entertained a number of their friends Saturday evening at a dancing party. A nice supper added to the enjoyment of the evening.

Mr. and Mrs. H. R. Thomm are returning to their home in Port Arthur, Ontario, next Sunday after a three weeks visit with the latter's mother, Mrs. Joseph Fournier.

Mr. and Mrs. Lars Rasmussen had as their guests over the week end four nieces from Flint, Mrs. F. Barnard, Mrs. Wm. Woodfield, Miss Carrie Johnson and Mrs. E. Jones.

Mrs. Cecelia Jorgenson and son Axel are spending the week here visiting the former's sister, Mrs. Johannes Rasmussen. They came to attend the funeral of Jens Eilerson.

Waldemar Jensen and his two assistants, Adolph Peterson and Oscar Borchers returned Saturday from Burt Lake, having finished the redecorating job they were doing there.

Little Ida June, daughter of Mr. and Mrs. Frank Millikin, who has been visiting for nearly two weeks is now very ill at their home on Park street. Their many friends are anxiously hoping for her recovery.

Mr. and Mrs. Joseph Firstil and their mothers, Mrs. Firstil and Mrs. Gerow and the Misses Katherine and Agnes Firstil of Saginaw were guests at the Walter Nadeau home Sunday, coming to see the new baby.

Ernest Hossli was the guest of Miss Beatrice Cottle at Rudyard over the week end.

Miss Dorothy Reid of Twinning is visiting her grandparents, Mr. and Mrs. James Reynolds Sr.

Somebody is going to get a bargain on a coat as I am closing out all coats, Redden & Cooley Gift Shop.

Carl Nelson and family have moved from the dwelling rooms over the Grayling Bakery to the Chris Schow house.

Mrs. Holger Schmidt returned Sunday morning from a few days visit in Ann Arbor. Her son Howard of Flint came to spend the week end.

Mr. and Mrs. Francis Lagrow and little daughter Kathryn Ann of Detroit and Mrs. Lagrow's sister, Miss Edna Schaffer of Pawama have been visiting the former's parents, Mr. and Mrs. Alex LaGrow since Saturday.

Mr. and Mrs. Eugene Papendick and children, accompanied by Miss Marie Newell, Mr. J. Endricks, Ernest Lovely and Wm. Woods, drove to Fife Lake and spent the week end with Mrs. Papendick's father and family.

Mr. and Mrs. Kai Hanson and daughter of Detroit were in Grayling for a short visit Sunday. They came to accompany Mr. Axel Sorenson and Mrs. Carl Krippeke home, who had come from Detroit to attend the funeral of Rasmus Jorgenson.

The Our Gang sewing club met at the home of Mrs. Jessie Babbitt Thursday of last week. At the time a stork shower was given in honor of Mrs. John Stephan Jr., and a birthday bouquet was presented Mrs. Barton Wakeley. Mrs. Seeley Wakeley won the guessing contest and Mrs. John Stephan the game contest.

Mr. and Mrs. Oscar Hanson and Mrs. Esbern Hanson left Tuesday for Millbrook, New York to attend the graduation of Misses Margrethe and Ella Hanson from the Bennett School. Mrs. H. A. Bauman, and Mr. and Mrs. Walter H. Woodson, Jr. of Salisbury, N. C., will also be in attendance.

Mrs. Walter LaMotte, daughter Earline and son Bawerd of Lansing came Saturday to be the guests of her parents, Mr. and Mrs. Geo. Collen for a week. Mr. LaMotte will join them today and remain for the rest of the week. Their daughter Walthine is making her home with her grandparents and attending school here.

Frank Ahman, who is employed in Onaway was home over Sunday visiting his family. He suffered an injury of the fracture of two or three ribs recently, but is recovering nicely.

Mrs. Ahman accompanied him on his return to Onaway and is remaining for the week. As soon as school closes the Ahman family will move to Alma where Mr. Ahman has a fine position awaiting him.

Word was received by the LaGrow family last Wednesday of the death that evening of Mrs. Dolphus Charron at a hospital in Flint. Mrs. Charron took ill Sunday and underwent an operation the following morning, passing away two days later. Mrs. Charron was formerly Lucy Brick and the family were residents of Grayling for years, moving to Flint about five years ago. The funeral was held Saturday. Surviving the deceased are her husband and six children.

Walter J. Nadeau and Louis Kessler were in Grand Rapids from Saturday until Tuesday in attendance at the 29th annual state convention of the Knights of Columbus, as delegates from the local council. There were 70 councils represented and the next convention will be held in Bay City. Mrs. Kessler and daughter Margaret accompanied them and visited her sister, Mrs. Hugh Kelley.

Take your prescriptions to the Central Drug Store.

Rolla W. Brink of Bay City was in Grayling last Friday shaking hands with old friends.

One lot men's work socks, 10c pair at Cooley's Economy Store, next to bakery.

The Ladies Aid will meet in the Church parlors, Friday, June 7, at 2:30 o'clock.

Miss Ruth Richard and Wm. Garner motored to Lansing with the latter's brother Sunday.

Miss Edith Hosier spent Sunday at her home in Kalkaska, and Miss Vandyne visited over the week end in Mt. Pleasant.

Mrs. Maguire Dupree and granddaughter and Mrs. Guy Miller and daughter of Bay City have been visiting friends in Grayling this week.

Mrs. Emil Niederer entertained a few ladies Saturday afternoon in honor of Mrs. Ralph Warner, Mrs. Carl Krippeke and Mrs. Axel Sorenson of Detroit.

Word came to Mrs. William Herie Sunday announcing the arrival of a son at the home of Mr. and Mrs. Carl A. Brownell (Laudra Neilsen) of Flint.

Miss Rosalyn Lewis and Miss Louise Sibley motored to Traverse City Sunday with Miss Lewis' parents, Mr. and Mrs. S. J. Lewis of Gaylord.

Mr. and Mrs. J. L. Martin entertained Mr. and Mrs. C. M. Barnes and daughter Crystal of Jackson over the week end while both families enjoyed a fishing trip.

Mrs. Bruce Greenbury and little son Bruce Jr., of Detroit are visiting at the home of her father, Oscar Taylor. Miss Edna Taylor was here for the week end.

Mrs. Byron Newell and the two youngest children returned Sunday from Manton where they had been visiting with relatives for a week. Miss Wilma Lytle accompanied them home to remain for a visit.

Mrs. Emil Niederer while in attendance at the convention of the Woman's Home Missionary society in Bay City last week had the honor of being elected Thank Offering secretary for the Saginaw-Bay district of the society.

Friends of Mrs. Nettie Sherman will be glad to know that she is very much improved. Mrs. Sherman suffered a stroke of paralysis early this spring and did not seem to get along so well, but the last few days has improved greatly.

T. W. Hanson and sister Mrs. Sidney J. Graham are in Chicago, where they will attend the graduation of the former's daughter Miss Virginia from the school she is attending, the exercises to take place Saturday. Esbern Hanson Jr., who attends school in Delafield, Wis., will also be in attendance.

Mr. and Mrs. James McNeven and daughter Miss Ruth visited their daughter, Mrs. Clare Smith and family in Lansing Saturday and Sunday. They were accompanied home by Miss Madonna Carrievau of Jackson who will be the guest of her grandparents, Mr. and Mrs. John Charlefour, and of her aunt, Mrs. Frank Sales for the summer.

Paving on U. S.-27 is going on rapidly. One side of the strip from the railroad crossing at the south to the corner of McClellan street was finished Wednesday morning. Another week will no doubt see one side of the course completed from one end to the other—about 2½ miles. July 4th should find this strip ready for service.

SCHOOL NOTES

(Continued from first page)

Anyone happening to see Libby Matson running around, grasping at apparently nothing in the air, needn't be alarmed as to her sanity. She has recently been appointed a Prof.—more next week. Apply to Clara Bugby for particulars.

Monday the students were suffering from the heat. Some classes were held outdoors but it was much cooler in the well ventilated classrooms.

A Senior class meeting was held Monday. The class day program was arranged and is as follows:
Valedictory—Lewis Engle.
Sajutory—Ellen Speck.
Class History—Elmer Neal.
Class Will—Elmer Fenton.
Class Prophecy—Laura Knibbs.
Gitary—Wm. Garner.
Class Poem—Corrine Sheldon.
Class Song—Pauline Lietz.

President's Address—Stanley Stephan.

Mary Mahneke gave an oration, "At the Grave of the Unknown Soldier" by Warren G. Harding, at the Junior class assembly program Wednesday.

Mary Schumann was in Grand Rapids Monday.

Thorwald Sorenson was kept busy over the week end assisting his father as undertaker.

We wonder why Mr. Cushman became so angry Wednesday when asked to announce a special meeting of ? ? They shouldn't keep us after school if they do not want new organizations in the school.

Elmer Neal has a dandy new green sweatshirt with a large G on the front and four white stripes on the left arm.

Last Tuesday the 9a and 9b Algebra classes held a contest on the "Cases" they have studied thus far. After three exciting rounds the 9b's were proclaimed victorious. The 9a's, because they lost, must give the 9b's a picnic some day this week.

Dorothy Hoelsi, being employed down the river, was out two days last week.

Last Wednesday, five certain members of the student body captured a huge fly for dissecting. In order to kill it properly, it was placed in a glass flask and sulphuric and nitric acids were added. After this, it was extracted from the mixture by the president of the group and dissected. A very interesting as well as appetizing experiment? ?

We wonder why James Post uses the French class room as a dressing room—if you don't know perhaps Tressa could supply the information.

Miss Richards Hygiene class went on an expedition Monday morning. They went over to the tourist park and went through their daily dozen.

Hurrah! Another victory for G. H. S. Last Friday we "Beat" West Branch with a very large score, 6-18.

Why all the ink blots on the last two rows of people in second hour session? ? ?

There are only three weeks more of school left and everyone seems to be working hard to get through. The last week will be used for exams and the checking up of credits received by pupils.

Lost—One wooden hammer, about a foot in length, brown in color, with wooden shaft and mallet at one end. Mallet is much dented and scratched by frequent pounding. Shaft is loose so that it often comes off when it is struck suddenly on a desk. Finder please return to Mr. Hill.

The Senior play went off with a bang and ended with a grand flourish last Friday night. The actors did their best and deserve much credit for putting on such an entertainment in so short a time.

The Juniors are eagerly awaiting

the arrival of their class rings, which will arrive the first of June.
Lewis E. (In Chemistry class)—Miss Lewis, do you know how pig iron got its name?

Miss Lewis—No, I can't say that I do.

Lewis E.—Neither do I.

American History Student—Miss Estee, did you ever hear of the Baker bill?

Miss Estee—Why, no, I didn't. What is it?

Student—There isn't any.

Mr. Hill—I'm afraid you're one of those people who drop their books as soon as the bell rings.

Bill Harrison—Not me! After I put my books away I always wait ten minutes for the bell.

The Johnson boys, former students of Grayling High, are joined by us all in their recent bereavement at the death of their mother, Mrs. Samuel Johnson.

Our nurse, Mrs. Gorman, has been kept quite busy by the steady inflow of students, there for inspection.

The American History classes have been studying the World War. Some are having a hard time remembering all the battles, but we are glad that we have finished the war.

The Grayling boys' baseball team went to West Branch Wednesday instead of the date that had been set previously.

The English Literature classes were required to write a three hundred word essay on the works of Thomas Carlyle.

Miss Lewis intends to check up on all the Lab. experiments the last of the week. Anyone not having his work checked up in full will not be able to make the course.

We wonder why there are so many absences these days? Perhaps the weather has something to do with it.

NEW E.M.T. MEMBERSHIP CARD; TAG YEAR FOR EAST MICHIGAN

The new membership card of the East Michigan Tourist association has made its appearance. It is a circular card printed in three colors prominently showing a map of Michigan and lettered for members of 1929.

Owing to the Legislative appropriation and in view of the campaign to advertise East Michigan to the fullest extent, the cards are inscribed "1929 Ad Club, East Michigan Tourist Association."

They are sent to members of the NorthEastern Michigan Development bureau and to members of the East Michigan Tourist association and to all who subscribe to the special fund to advertise East Michigan this year.

This is Tag Year, not "Tag Day," for East Michigan where every place of business should display the tag, not as an emblem of a worthy charity but symbolizing an investment that will pay dividends.

For Girls and Women

Corns—with their torture and pain—make it impossible for you to wear small stylish pumps and slippers. And they add aching pain lines to your face, too. But corns are needless. You can be free of them in a jiffy by using Jiffy Corn Plasters.

The medication in JIFFY Corn Plasters takes out the pain and then softens the corn and loosens it so that you can lift it out—root and all. We guarantee one package of JIFFY to remove one corn entirely, or we will refund your money without question.

NEWS REVIEW OF CURRENT EVENTS

President's Law Enforcement Commission Begins Its Great Investigation.

By EDWARD W. PICKARD

PRESIDENT HOOVER'S commission on law enforcement has been appointed and is about to begin its momentous task of investigating the evils and failures of federal judicial procedure. The President's selection for membership on this important body have met with warm approval. Its chairman is George W. Wickersham, attorney general of the United States during the Taft administration. The others are Frank J. Loesch, assistant state's attorney of Chicago; William S. Kenyon of Iowa, United States circuit judge; Newton D. Baker of Cleveland, secretary of war under Wilson; Roscoe Pound, dean of the Harvard law school; William A. Grubb of Alabama, United States district judge; Paul J. McCormick of California, United States district judge; Kenneth R. Mackintosh of Seattle, former chief justice of the Washington state supreme court; Monte M. Lemann, president of the Louisiana Bar association; Henry W. Anderson of Richmond Va., United States member of Mexican claims commission, and Miss Ada L. Comstock, president of Radcliffe college, Boston.

With the exception of Miss Comstock, every one of these is an eminent lawyer, and three of them, Loesch, Baker and Pound, have had special experience in crime investigation. The one woman on the commission is also the sole representative of the lady, and some regret has been expressed that there is no one to share with her this great responsibility. Not one of the members has been actively identified with either the vets or the dubs, although Judge Kenyon is generally regarded as the champion of the prohibitionists. Three of the commissioners, Baker, Grubb and Lemann, are Democrats.

Though the scope of the commission's activities is by no means limited to inquiry into enforcement of the prohibition laws, this phase of the investigation is looked upon as the most important and it is certain to be the most interesting to the people of America. Already the dry and wet organizations are marshaling their forces and preparing to present before the commission all the facts and arguments at their command. Mr. Hoover invited the members of the commission to eat luncheon at the White House and listen to his outline of the scope and purposes of their inquiry.

RAILROADS of the country won a great victory when the Supreme court of the United States handed down its decision in the famous St. Louis & O'Fallon railroad case which on behalf of that obscure little coal road had been fought through all the courts. The immediate object was to have set aside an order issued by the interstate commerce commission calling for a refund of a part of its earnings, coming under what is known as the recapture clause of the transportation act, permitting railroads to retain one-half of their earnings in excess of 6 per cent, and requiring them to pay over to the government the other half.

Reversing a lower court decision and annulling the order, the Supreme court decided that the interstate commerce commission must revise its whole method of valuing railroads to reach a basis for rate making. Years of work by the commission must be done over again in full or in part. Present values and the cost of replacements must be considered by the commission in setting the basis of railroad compensation, the court ruled. This replaces the 1919 valuation now used by the commission. Justices Brandeis, Holmes and Stone dissented.

At first it was believed this decision would bring about higher passenger and freight rates, but later this was denied. The immediate effect on the New York Stock exchange was startling. Prices of rail stock soared with a rush of buying orders, but the advances were cut in half by liquidation in industrial stocks.

FORMER SENATOR IRVINE L. LENROOT's appointment to a federal judgeship was finally confirmed by the senate despite the determined opposition of a number of radicals. Soon thereafter a newspaper published what purported to be the roll call by which this action was taken in executive session, and this stirred up a row that has resulted in the barring of news service reporters from the floor of the senate. This step was taken by the rules committee and reported to the senate with a resolution censuring the unnamed senator or senator employee who had disclosed the roll call. After considerable discussion, Vice President Curtis announced that while news service reporters have been accorded the privilege of the floor "by courtesy for half a century or more," the rule specifying the persons entitled to admission will be rigidly enforced in the future.

FOLLOWING Colonel Lindbergh's flight in his amphibian plane to North Haven, Maine, carrying his fiancée, Anne Morrow, her mother and two sisters, the news developed that the youngest of the girls, Constance, had received extortion letters threatening her life if \$50,000 were not paid to the writer. Constance got two of these notes at Milton academy, Westwood, Mass., where she is a sophomore. Attempts to catch the extortionist are being made.

flower by a decoy package raised, and at this writing his or her identity has not been discovered. For several days the Morrow family, heavily guarded by special officers, remained on their North Haven estate, and then Colonel Lindbergh took them all to New York in his plane.

GOVERNOR'S ISLAND and part of the financial district of New York were theoretically devastated by bombs dropped by the army's huge Keystone bomber which made a non-stop flight of 800 miles from the headquarters of the army air maneuvers at Fairfield, Ohio. Next day the bomber returned to the metropolis accompanied by a smaller biplane from which it was successfully refueled while in flight.

ONE HUNDRED AND EIGHTY-SIX clergymen, educators and leaders of religious thought in Great Britain and America have issued what is entitled "A British-American Message to the Churches and to All People of Good Will." It is an appeal for better understanding between the American and British peoples, and expresses the hope that all war may soon be abolished. The signers pledge themselves to accept in spirit and in fact the words of the Kellogg treaty; to "discontinuance any and all expressions or acts which contemplate as possible the use of any but pacific means for the settlement of disputes or conflicts; and to do our utmost to rally all men and women of good will to unite with us in this same determination."

WHILE the senate and house conferees continued in deadlock over the export debenture scheme in the senate's farm relief measure, the Republican members of the house tried to fix up their tariff bill so it would be assured of passage. There was a lot of for rolling and various trades were engineered. It was said duties would be placed on hides, leather and shoes and those on a number of farm products increased. Every effort was being made by the leaders to prevent a vote on the floor of the house on amendments for a reduction in the proposed duty on sugar or for the restoration of cement, brick, shingles and lumber to the free list. The Michigan automobile industry together with other industries using alcohol, such as manufacturers of drugs and paints, were reported to have triumphed over Illinois and Iowa corn growers who have been seeking a duty on blackstrap molasses high enough to stimulate the use of corn in the manufacture of alcohol.

In the matter of the farm relief measure, the house conferees were insistent that there be no vote in the house on the debenture plan, while the senators argued earnestly that such a vote would make easier their task in persuading the senate to accept the bill with that feature omitted.

RECENT disclosures of the activities of the International Paper and Power company in financing newspapers, made during the investigation by the federal trade commission, inspired Senator George Norris of Nebraska to deliver in the senate a long address in which he urged legislation to prevent the acquisition of newspapers by public utilities concerns and to curb the expansion of such corporations. The Nebraska senator President Hoover for putting Lenroot on the federal customs appeals bench, and bitterly denounced Samuel Insull, the Chicago public utility magnate.

Mr. Norris said he believed every newspaper in the country has had the opportunity to sell out to the "power trust," the existence of which he has been declaring for years, and passionately pleaded with publishers to reject the offers of the power magnates so that the country might have a free press.

CHILE and Peru are immensely relieved by the settlement of the old Tacna-Arica dispute, which was formally announced in Washington. The agreement reached was that proposed by President Hoover. Under its terms Tacna is awarded to Peru and Arica to Chile. The city of Arica, the only port of call for steamers on the Tacna-Arica coastline, is awarded to Chile, but Peru is to have the rights of a free port there. Chile has agreed to erect a railroad station, a custom house, and a wharf at Arica for the use of Peru. Chile also agrees to pay Peru \$6,000,000.

Bolivia, which had hoped for an outlet to the sea through the port of Arica, alone is dissatisfied with the settlement.

POOR old China seems to be on the verge of another great civil war. Gen. Chiang Kai-shek, head of the Nationalist government, and Gen. Feng Yu-hsiang, the "Christian general," have reached the parting of the ways and at last reports were about ready for armed operations against each other. At present the trouble is centered about Canton. Just what it is all about is difficult to understand at this distance, but Feng accuses Chiang of a desire to dominate the country, asserts his government is "illegal" and warns foreign consuls against lending him assistance.

DR. ALBERT VOEGLER, secretary of the German Federation of Industries, has resigned from the German committee of the conference of reparations experts and departed from Paris, which led to fears that the conference would be a complete failure. In fact, it seemed certain the negotiations, not broken off, would be greatly prolonged. Germany had accepted the American compromise plan with certain conditions, and the allied nations had practically accepted these conditions, but with reservations. The Germans indicated four of the reservations of the allies were all totally unacceptable and that they would yield no further, and the allies stated that their limit had been reached.

FOREIGN ministers of the little entente held a conference in Belgrade in which, according to official an-

The Health of Your Boy

Would you build up extra resistance in your boy so that he can overcome with the utmost indifference the many ills to which boys are seemingly heir? GRAYLING BREAD, home baked from pure ingredients, is one of the best health builders he can eat—fresh every day.

NEWSPAPER'S JOB PLANT SERVES WHOLE COMMUNITY

"Well, Joe, so your daughter is going to be married! I got an invitation today. Some class to the announcements, too. Where did you have them done—out of town, I suppose."

"I should say not! Why should I pay extra to have the work done away from home? I went to George Stone over at the weekly office and his printer ran off the invitations on his job press for much less than I would have to pay out of town."

"Of course, I might have known that. Especially when George does so much job printing for me. The weekly office gets out all my advertising handbills and circulars, as well as my letterheads, envelopes, statements and other printing. It costs very little, too."

"Yes, the weekly's job printing plant is a regular public utility to this town. Though it is privately owned, it is of as much service as the electric light plant or the telephone company."

"Not only that, but the weekly office really understands the art of printing as well as the business of typesetting and press operation. They turn out some beautiful jobs. Do you remember that handsome Christmas announcement they printed for my store? Done in colors on the best paper, and at very low cost."

"It is because of their fine work, I guess, that they are doing all the work for the community."

A man up in Canada challenges Commander Byrd in the Antarctic to a game of chess by radio. It occurs to us that a game of freeze out would be more appropriate.

Our forefathers may have had to put up with muddy roads and tin wash basins but they didn't have to worry about germs because they didn't know that they had any.

NEW RESORT ON HIGGINS LAKE

(By E. M. T. Service)

Twenty-five acres with a frontage of 1,208 feet on Higgins Lake, in Roscommon county, has been purchased as a resort development by E. J. Hickey & Son of Detroit and Mrs. L. A. Wheeler of Troy, Ohio. They plan to subdivide the acreage into 18 lots, having a depth of 300 to 400 feet with a 50 foot street in front. The back part will be reserved for future development. They plan to form an association among their friends and the resort will be conducted as a community project. Plans call for a central dining room. Some of the homes and a dining hall will be constructed this summer.

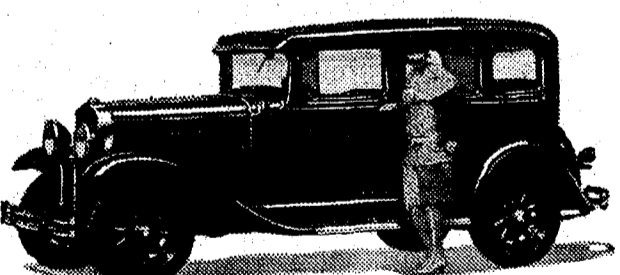

The old fashioned man who thought that a rubber tired rig with red running gears was the last word in modern transportation, now has a son who isn't satisfied with anything less than a straight eight that will do seventy without purring louder than a kitten.

NOTICE

THE ANNUAL MEETING OF THE BOARD OF REVIEW OF THE TOWNSHIP OF GRAYLING WILL BE HELD IN THE TOWN HALL ON TUESDAY AND WEDNESDAY, JUNE 4 AND 5 AND MONDAY AND TUESDAY, JUNE 10 AND 11, 1929, FROM 9 O'CLOCK A. M. TO 4 O'CLOCK P. M. ON EACH OF SAID DAYS, TO REVIEW THE TAX ROLL.

Marquette Offered by Buick in Medium-Price Field

The Four Door Sedan is one of the six models comprising the new Marquette line just introduced by the Buick Motor Company

Buick dealers throughout the country today are displaying the Marquette, a new Six, produced and distributed by the Buick Motor Company. This car which will sell in the medium-price field, is offered in six models—a two-door sedan—a four-door sedan—a business coupe—a sport coupe—a roadster and a touring car.

The Marquette is an exceptionally large car for its price class having a wheelbase of 114 inches. Prices on the car range from \$965 to \$1035. The six-cylinder L-head motor and the crankcase are cast in one integral unit. The engine has a bore and stroke of 3 1/4" by 4 1/2" and develops 67.5 maximum brake horsepower. Buick officials say the Marquette has remarkably quick acceleration and a maximum speed up in the seventies.

All models are designed along low swung rakish lines. The bodies are built by Fisher and finished in Duco color combinations that follow distinctive fashion trends. The radiator which is covered with a metal grille is deep with a narrow chromium plated rim that balances with the chromium plated hub caps. The wheels are sturdy and carry large section 28x5.25 balloon tires.

The Marquette has a new non-glare Fisher VV type windshield which sets at an angle of seven degrees from the perpendicular and eliminates all glare, whether from the rear, front or sides.

Other features embodied in the Marquette include large internal expanding Duo-Servo four-wheel brakes, an adjustable steering wheel, adjustable driver's seat, built-in bumper mountings and all chromium plated outside hardware. The soft, but durable, mohair upholstery is waterproof, impregnated under a new process with a rubber solution.

A full pressure lubricating system is used on the new car insuring a constant flow of oil to main bearings, connecting rod bearings, cylinder walls, camshaft bearings and the timing chain. The water cooling system is thermostatically controlled and has ample capacity to keep the engine at normal temperatures under all driving conditions.

The tapered chassis is exceptionally sturdy and, together with the long semi-elliptic springs, gives the Marquette new qualities of restful, smooth riding at all road speeds.

It is true in life that the nonconformist usually is relegated to the side line.
